Developing Wind Energy In The Outer Moray Firth

Public Consultation Exhibitions

To reduce harmful greenhouse gas emissions and increase the amount of energy generated from renewable sources, Moray Offshore Renewables Ltd propose to use deep water engineering expertise from the North Sea to develop wind energy 22km from the Caithness coast in the Moray Firth.

If you would like to find out more, please come to one of our public exhibitions where you can discuss the proposals with our project staff, and take part in our consultation.
